School of Pharmacy, Southern Illinois University Edwardsville

SOUTHERN ILLINOIS
UNIVERSITY EDWARDSVILLE
SCHOOL OF PHARMACY

## Background

- •According to the CDC, nearly 50% of all adults in the United States are affected by uncontrolled hypertension
- Uncontrolled hypertension disproportionately effects minorities and disadvantaged communities
- •SIHF aims to serve underserved populations throughout Central and Southwestern Illinois
- •The Heath Resources & Services
  Administration (HRSA) provided a
  graft for patients throughout SIHF
  locations for cell enabled self measured
  blood pressure devices.

#### **OBJECTIVES**

- Address hypertension among racial and ethnic minority populations
- Improve health disparities and promote healthier lifestyles

### Project Overview

- Project will be implemented for 2 years
- Patients issued blood pressure devices
- Patient results will be uploaded to the electronic health records system for patient and provider access
- Healthcare providers follow-up periodically with patients

### Device Selection

- Patients will utilize A & D Medical UA-651BLE Premium Wireless Blood Pressure Monitor
- Monitor selected due to ability to integrate with the electronic health records system

## Health Care Provider Training

All members of the healthcare team will be trained and assessed on protocols and proper blood pressure monitoring technique adapted from 2017 ACC/AHA guidelines

Key Steps for Proper Blood Pressure
Measurements in Office

- 1. Properly Prepare the Patient
- 2. Use Proper Technique for Blood Pressure Measurements
- 3. Take the proper measurements needed for diagnosis and treatment of elevated blood pressure
- 4. Properly document accurate blood pressure readings
- 5. Average the readings

## Patient Eligibility

- Patients will be considered if they meet the following criteria:
  - Have average blood pressure  $\geq 140/90$  **OR**
  - Clinical ASCVD or 10-year CV risk  $\geq$  10% with average blood pressure  $\geq$  130/80 **AND**
  - Have access to Bluetooth enabled device (cell phone or tablet)
- Ineligible patients include those who:
  - Live an assisted living facility
  - Patients with home health care assistant
  - Have terminal illnesses
  - Those who have the inability to self-monitor in any way (eg: dementia)

## Operation Workflow

Select Eligible Patients

Discuss Program with Patients

Patients Enroll in Program

Patients Trained and Distributed Blood Pressure Monitors

Community
Health Workers
Follow Up

## Financial Analysis

#### Budget: ~\$1.1 million

Product	Charge	Estimated Quantity	Total
BP Monitor	\$48	5,000	\$240,000
Tri-Fold Brochures	\$35	6,500	\$227,000
Educational Handouts	\$0.12	6,500	\$780
Incentives	\$10	5,000	\$50,000

Salaries for 2 community health workers: \$252,600

Monthly electronic health records system maintenance fees (24 months): \$124,000

Total remaining balance: \$205,620
